

MRPA PRESENTS

Fetal Alcohol Spectrum Disorders (FASD) & the Big 3: Raging, Lying & Stealing

Tuesday March 3, 2026 6:30-8:00pm

About Our Presenters

Barb Clark is the founder of FASD Mosaic, a national speaker on brain-based behavior, an adult with FASD, and an adoptive parent. She is the author of Raising Kids and Teens with FASD.

Arnie Eby is the Executive Director of the National Foster Parent Association and a founding member of MRPA. A foster and adoptive parent of over 150 children, he brings lived experience to national advocacy, education, and support for resource families.

Fetal Alcohol Spectrum Disorders (FASD) affect brain development and are often misunderstood or misdiagnosed. This session explores how behaviors like raging, lying, and stealing are brain-based responses tied to challenges with memory, impulse control, and emotional regulation—rather than intentional defiance—using a trauma-informed, neurobehavioral lens.

Optional coaching sessions will be offered, beginning March 12, 2026, from 7:00–8:00 PM.
