

JOIN US IN A CAMPAIGN TO HEAL CHILDHOOD TRAUMA

GET INVOLVED @ ENDCHILDHOODTRAUMA.COM

The purpose of this five-city tour is to raise awareness of how childhood trauma impacts the development of 1 in 4 children in the U.S. and how these often-overlooked experiences can adversely impact children's development, physical and emotional health. November is National Adoption Month, an important time to recognize that adoptive children and those in foster care are at significant risk for Developmental Trauma. All proceeds from this campaign go to three non-profits who serve this population: ATTACH, Attachment & Trauma Network, and American Adoption Congress.

The Lifelong Impact of Adoption and Early Trauma

Building Resiliency

Therapeutic Parenting

Discuss techniques parents can use with their children.

Canine Therapy in Healing Childhood Trauma

Learn how Canine Therapy assists in restoring lasting relationships.

Creating Trauma-Sensitive Schools

Create a safe environment to help students learn.
